PROFESSIONAL SUMMARY

Full-stack engineer and AI product developer with expert-level proficiency across front-end (**React, Next.js**) and backend (**C++, C#, Python, Node.js**) stacks. Since 2023 I have spearheaded the *first* generative-AI features inside Epicor's Enterprise Content Management (ECM) suite—designing architecture, coding production C#/.NET services, and integrating large-language-model (LLM) pipelines for adaptive autofill and sub-300 ms semantic search over 10000-page documents. Previous roles include building IoT and data platforms at start-ups and remotely training 200+ professionals on AWS, Salesforce ServiceNow. Strengths: Retrieval-Augmented Generation (RAG), RLHF, vector search at scale, multitenant SaaS design, and end-to-end product delivery.

TECHNICAL EXPERTISE

Languages & Frameworks

C#, .NET 8, C++, Python (FastAPI, LangChain, Pandas), JavaScript/TypeScript (Node.js / Express), React 18, Next.js 14, HTML 5, CSS 3/Sass, Swift

AI & Data Science

Transformer fine-tuning, RLHF, RAG, prompt engineering, sentence-transformers, OpenAI models, Hugging Face, FAISS/HNSW, Apache Solr 9 Vector-Search, LightGBM, Scikit-learn, NumPy

Databases & Storage

Microsoft SQL Server, PostgreSQL, SQLite, Redis, AWS S3

Cloud, Runtime & Tooling

AWS (EC2, S3, Lambda, API Gateway), Azure OpenAI, Docker, Nginx, Shell/Bash scripting, Ubuntu Server, GitHub Actions, Jenkins, Splunk

Other Platforms

Salesforce, ServiceNow, Power BI, Jira, Confluence

EXPERIENCE

Associate Product Developer – AI

Mar 2023 – Present

Epicor Software Corp.

Bangalore / Remote

- **Designed and shipped ECM's inaugural AI module**—an adaptive autofill engine that learns per-customer invoice patterns and predicts field values in real time, reducing keystrokes by 25%.
 - Implemented multitenant event pipeline (Azure Service Bus → Redis Streams → .NET gRPC) ingesting 2TB of anonymised logs per month.

- Engineered probabilistic suffix - tree context encoder and LightGBM ranking model achieving **92 % MRR at 40 ms P95 latency**.
- **Built large - document RAG from scratch** for PDFs up to 10000 pages and corpora of 10000 documents.
 - Created hierarchical semantic - layout chunker (headings, tables, vision cues) generating 270 M tokens; embedded with `all-mpnet-base-v2`.
 - Indexed vectors in Apache Solr 9 (HNSW + BM25 hybrid) and tuned query - time rerankers to deliver < 300 ms P99 end - to - end search with highlighted citations.
 - Wired GPT - 4o / Azure OpenAI orchestration layer with streaming SSE to React front - end; implemented guardrails, rate limiting, and usage telemetry.
- Integrated OAuth 2.0 security via Epicor Identity Server and automated CI/CD with GitHub Actions and Docker multi - stage builds.
- Mentored three graduate engineers on LLM prompt design, vector - DB tuning, and .NET performance profiling; led two internal tech workshops.

Remote Trainer – AWS, Salesforce, ServiceNow

2021 – 2022

Freelance

- Delivered six live cohorts (200 + learners) covering AWS Solutions Architect, Salesforce Admin, ServiceNow ITSM, and Python for Data Sci.
- Authored 30 + lab guides and cloud - formation scripts, boosting certification pass rate from 62 % → 89 %.

Data Analyst & ML Engineer

2020 – 2021

Handlcart Private Ltd.

- Built Power BI dashboards and ARIMA/Prophet models for weekly demand forecasting, improving accuracy by 18 %.

Full - stack Engineer (Consultant)

2019 – 2023

Ronessa Schools Ltd. (Remote)

- Developed and maintained school ERP (Python / Laravel + Vue); integrated biometric IoT attendance devices, cutting admin hours by 30 %.

SELECTED PROJECTS

Spintrip — IoT Car - Rental Platform

2022

- Built Flutter mobile apps, Node.js API, and custom GPS tracker streaming MQTT telemetry at 5 s cadence; auto - generated predictive maintenance alerts.

Time - Series Forecasting of Indian Exports

2020

- Pipeline in Pandas/Statsmodels; produced interactive policy dashboards.

AI - Based Warehouse Management System

2020

- Capstone: inventory forecasting with XGBoost and CCTV anomaly detection (Tensor - Flow CNN).

EDUCATION

B.Tech — Information Science

2019 – 2023

CMR Institute of Technology, Bangalore

- CGPA 8.2 / 10 *Graduated with Distinction*
- Thesis: *AI-Driven Warehouse Management System* (see Projects)

Higher Secondary (CBSE)

2018

JVM Shyamali, Ranchi

CERTIFICATIONS & COURSES

- Scale AI — RLHF Trainer Program (2024)
- AWS Certified Solutions Architect — Associate
- Salesforce Certified Administrator
- ServiceNow Certified System Administrator
- DeepLearning.AI — Deep Learning Specialisation
- HKU — Full-Stack Web Development (Coursera)

LANGUAGES

English (Professional), Hindi (Native), Kannada (Basic)

EXTRA - CURRICULAR

- GitHub Education mentor — Open Source Fridays
- Winner, *TYL 2022 3 Hackathons* — C++, Python and AI/ML
